ADVANCED AESTHETICS BY CARMEN

BODY OR FACIAL DIATHERMY (50') €90/ (80') €115

Diathermy is often used in physiotherapy to accelerate recovery and reduce the pain of *muscle and soft-tissue injuries*, such as sprains, contractions or tears, by applying localized heat with high-frequency electric currents. The technique also induces lymphatic drainage, beneficial in the treatment of cellulite, and can have a remarkably firming effect on the skin.

Applied as a *facial treatment*, diathermy firms, shapes and generally rejuvenates the skin's appearance, proving highly effective at reducing dark circles and under-eye bags, and at minimizing wrinkles, expression lines, scars and blemishes.

DIAMOND-TIP FACIAL (50') €85

A diamond-tip deep cleansing facial, also known as mechanical exfoliation, uses a precision tool to apply varying degrees of micro-dermabrasion. Dead cells are painlessly removed and the skin's layers are gradually evened out. This gentle, non-invasive procedure stimulates collagen production and leaves your skin healthy and smooth. Suitable for all skin types, even those with a high degree of sensitivity.

VIRTUAL MESOTHERAPY (50') €85

Virtual mesotherapy, or electroporation, is designed to provide essential nutrients and beneficial compounds to the skin while avoiding the dreaded needles of traditional mesotherapy. The emission of a low-intensity current increases the skin's permeability and causes a brief opening of the pores within cellular membranes, progressively aiding in the absorption of a multivitamin solution that can be modified to address the particular needs of your skin.

The background image shows a modern, brightly lit interior space, likely a thermal area or spa. It features large glass panels, light-colored stone walls, and a large, curved ceiling. In the foreground, there is a large, rectangular pool of water with a blue and white mosaic tile pattern. A dark blue, scalloped-edged overlay is centered over the image, containing the text.
